Dear Phyll & Ross,

I guess you may be back home
again. I thought I have not heard.

Oliver wrote & sent me a few photos she had
done. I had given her Grandfather's photo
& Lewis wrote to see if I could get her one
of Grandfather & Grandma I had, a large one
anyway I wrote & asked Oliver if she could get
one taken off for Lewis ^{Grandfather} Well she took a
photo of them both. Sent Lewis 2, lots to give
her one lot. She sent me ^{a set of} a negative of them
if I wanted any for anybody. It is very 29.3
clear & perfect. She also sent me a photo
of Grandfather, Grandma & Jackie's grave
next to her.

They have not got Frederick John as rare
but Jackie. There is moss & dirt on his
tomb with my microscope I could plainly
see 6 1/2 yrs. but not see dates.

Sue has been trying to get me to find out
about Jackie's dates for years.

② she could see, if she went to Wallabadah
cemetery & cleaned the dirt back off headstone
As I have not been over town ^{for decades} (Sydney) for
years. I have been too staggery to go over
but, now I have told Sue. Jackie was $1\frac{1}{2}$
years younger than Keith

Keith will be 69 in May & Jackie would
have been 67 $\frac{1}{2}$ next November 18. So she
can work it out.

Grandfather was born 1st Sept 1840

Died Feb 1914

Grandma born 14th July 1842 died 8 Oct 1927

Jackie's grave has lifted in place as top of
body part.

I have never seen the graves (never been
to Wallabadah cemetery) Uncle Ned (Grandfather's
brother) is there somewhere, as Edward Robbitts.
Uncle Ted is in Quirindi Harry next to him

Daddy (Uncle Ned) maybe in Idli as his wife
IF alive is in the town somewhere.

Since I saw you I became more giddy
& could not even go into nicks shops or over
to Mrs Le Blanc. So I ran up "Delex"

③ They come to Rome & test saw a 1 month
trial free of hearing aid, (prescribed)
now began had to take it away & drill
a hole through it & bring it back,
I am quite used to it now. It is on my
deafish ear, not the one that is kind of hot
He says "It will help my balance!" ^{inside} it hears OK.
So I hope it does. As they are very
dear. But if it does the trick I don't
bequidge the money. But a terrible
waste of money if not. Dr Irving Rose
up & said "IF I died even, that would
be that much less money for them.

He said "not to study that, but get it if
it helps." I could get one free, through
north shore hospital but it is bigger & more
clumsy than this neat little thing with tiny
batteries & with glasses, & it, over ear.
If too big, would be uncomfortable
with hat on, which I have to wear
with my cataracts.

If I went to north shore specialist I would have
to wait some time & I would have to go over
a few times & I could not walk when I get there, then
nobody (stopper)

④ I am not bumping elbows on doors now.
a 10 dollars over a back with taxi

I have not got Jim to take me places now,
The cancer in his arm aches a lot & keeps him
awake but Drs think they can save his arm.
It is in inside fleshy part just below elbow.
you cant see anything It is inward.

They are not going to operate or bend
fatty tumour on back of neck, as it is.
The weather at present is perfect
but rain is needed,

I have pulled up my phlox & petunias
as they were about done and bulbs
are coming up

Hope you can read the scribble

I have only got this small pad & I have
to have a rest before I teach I am.

He has gone lazy on me. I would say
not worth persevering but he has a lot of
music natural in him so I can only do my
best. Write soon. It was lovely to see

you & Hope all are OK

Love from Glad
least I have seen for long time
