

Dear Phyll & Ross,

126 Bungey St
Dubbo 2830

29. 7. 94.

I was happy to receive your card with news of safe arrival. Soak up the sun & views you have earned ~~you~~ have earned your winter holidays, many times over. I'm sure Ross' shump will heal with the help of the sun. Do you put metholated spirits on it? Or have you got some special cream with "modern" antiseptics. Marge had a weepy navel when she was born & metho & sun cured it in no time. Michael & Sophie have a son, James William, born on the 18th July at George Washington University Hosp. with all the yoga. Sophie has been doing she found it was such all that a dud. Her mother Celie is over here & let the young ones go out to dinner a few nights ago. She's also doing most of the cooking & Michael (wait for it) has been changing most of the nappies. He goes back to work this week - he has also bought a home video machine so I'm no doubt we'll have a video soon of this wonder boy. Anyway it is a relief to know all is well. I hope Michael & Janet will be able to see them this time.

I remember wes telling me that Grandfather built his school so that his children would receive education & "know the law". I think he & Grandma would be very proud of their young ones and all their achievements.

Sister Jean & Bill arrived last Friday. She had had to report to her doctor for the last time - she had a knee replacement 2 years ago. They asked to go home to Lane via Dubbo. We had three great days - then they left to go home via Quirindi. - visited the grans and had 2 hrs with Beryl & Fred over a cuppa. Beryl has bounced back after catching her shoe in a mat or tripping - will be enkering the newsagents. She

men flying into the shop & locals
who witnessed it said it was a
great take off & she would have
won a race with the flying start.
Fortunately she's always kept herself
in good nick so recovered fairly quickly.
John & Judy also came home for about
24 hrs, we had Bill home for the sun
lunch. He has lost more of course
since he's been in hospital hosp.
however we are all doing ok
best to keep him going including
the staff
Jenny is coming home this weekend.
Mavis a bank hol & Librarian's get
the holiday too. she comes via merreda
and Merreda which cuts the distance
instead of going down through Sydney.
I often wonder if Richard & Jane Mason
went from Balhurst to Mudgee & down
to the Kumber rather than back up
wretched Mount York (that's the one the women
used to walk down) as the descent was so steep.
It wouldn't have been so arduous. The Blue Mts
must have terrified them after the gentle slopes of
their part of Ireland. much love Emma + J + J
